Method: LAB-MTD-041

Identification A (Macroscopic) European Pharmacopoeia

Complies with monograph

The colour of the sample complies with the monograph.

The whole female inflorescence is a dense or more or less lax panicle, comprising sessile or almost sessile, elongated bracts (about 10 mm long) with dentate margins, intermingled with the flowers.

The fragmented inflorescence comprises parts of the axis of the inflorescence, the bracts and panicle, together with individual flowers or floral organs.

The female flowers are very small (about 2 mm) with a short pedicel.

The perianth is monosepalous and apetalous.

The inflorescence is more or less densely pilose, with covering trichomes and glandular trichomes that produce a sticky resin with an aromatic odour.

Identification B (Microscopic) European Pharmacopoeia

Complies with monograph

Fragments of the lower epidermis of the bracts comprising cells with slightly sinuous walls, anomocytic stomata, small glandular trichomes and glandular trichomes with a multicellular stalk and a multicellular head.

Whole glandular trichomes, with a multiseriate, multicellular stalk and a multicellular head covered by a domed cuticle.

Cystolithic and non-cystolithic unicellular covering trichomes; the conical, cystolithic covering trichomes have either thickened walls, a broad base and a curved, pointed end, with a clearly visible, lumpy, globular calcium carbonate deposit, or a narrower base and markedly pitted walls; the non-cystolithic covering trichomes are more elongated and have thickened, smooth walls.

Fragments of the orange-brown stigmas showing epidermal cells with very fine, faintly visible walls, terminating in large papillae with a rounded end

Fragments of the lower epidermis of the bracteoles with slightly wavy cells, glandular trichomes with a short stalk, anomocytic stomata, non-cystolithic covering trichomes and small glandular trichomes; small cluster crystals of the underlying mesophyll are clearly visible in the fragments of the bracteole epidermises.
